- Power Lift Package
- Raised deck with beaver-tail
- Ramps with storage on sides
- Skid Loader Package

FEATURE | FUNCTION | BENEFIT

BUMPER PULL CAR TRAILER | MODEL 3110

— FEATURE — FUNCTION — BENEFIT —

Aluminum Construction	Featherlites are made with an all-aluminum frame and skin.	With just routine maintenance, aluminum construction has higher resistance to rust and corrosion and in the long run, they hold their value longer. It's also lighter weight, increasing your payload capacity and making for a smoother tow.
3" I-beams on 12" Centers	3" I-beams run every 12" under the trailer.	Featherlites have a solid support system underneath the trailer for your heavy loads of cargo.
"Flex Foot" Ramps	Two "Flex Foot" ramps are standard. Ramps are stored underneath the trailer.	"Flex Foot" ramps more easily conform to the ground, which can often be uneven. This makes for easier and more convenient loading and unloading.
Wiring Harness	One-piece wiring harness is standard.	With Featherlite trailers, all wires are bundled in a protective jacket, known as the Featherlite wiring harness. Wire harnesses provide a watertight seal, protect against wire wear and tear and make connecting them to your vehicle easy. Without the harness, the individual wires would hang loose and unprotected.
Aluminum Floor	Featherlite's smooth extruded aluminum floor is standard.	The aluminum floor is stronger & more durable to last longer through heavy use when hauling your cargo. It also offers firm footing when loading and securing your vehicle to the trailer.
Removable Fenders	Fenders can easily be removed.	Removable fenders give you the convenience of easier loading and unloading.

FOR FULL ARRAY OF FLOORPLANS, VISIT [WWW.FTHR.COM](http://WWW.FTHR.COM).

\*10-year limited structural warranty on frame and superstructure. 3-year limited warranty on all other parts manufactured and installed by Featherlite. Some exclusions apply. Ask dealer for details.
