FEATURE | FUNCTION | BENEFIT

BUMPER PULL HORSE TRAILER | MODEL 7442

— FEATURE — FUNCTION — BENEFIT —

Aluminum Construction	Featherlites are made with an all-aluminum frame and skin.	With just routine maintenance, aluminum construction has higher resistance to rust and corrosion and in the long run, they hold their value longer. It's also lighter weight, increasing your payload capacity and making for a smoother tow.
Uni-Body Design	All components of the Featherlite trailer from side posts to roof rails to roof bows to cross members are engineered into a uni-body design.	The uni-body design makes the trailer stronger and more durable for the long haul.
White Lining	White lining on walls above rubber standard. Also includes insulation.	White lining creates a brighter interior for horses during loading & travel, keeping them calmer. It also gives the trailer a cleaner, more eye-appealing interior.
Integrated Rear Ramp with Double Doors Above	Integrated rear ramp makes loading your horses easier and safer.	The standard rear ramp on this model makes loading horses easier under a variety of loading conditions, and the top doors above give your horses more airflow in the warm summer months.
Aluminum Wheels	Four high-quality, polished aluminum wheels are standard.	These impressive aluminum wheels allow your trailer to retain its factory appearance longer and help your Featherlite trailer retain its value over the long haul.
Running Boards	Our convenient running boards span the full length of the trailer.	Understanding the need to quickly view your horses when you're on the road, these running boards allow a boost to view inside the trailer easily.
