- Tandem axles (4800# on 16'; 6000# on 20'; 7000# on 24'); Up to 7000# axles are optional

Gooseneck Stock Trailer Model 8117

FEATURE	FUNCTION	BENEFIT
All-Aluminum Construction	Featherlites are made with an all-aluminum frame and skin.	With just routine maintenance, aluminum construction has higher resistance to rust and corrosion and in the long run, they hold their value longer. It's also lighter weight, increasing your payload capacity and making for a smoother tow. Featherlite's stock trailers are built with sidewall extrusions that are thicker, allow for stronger welds and vertical tie ring integration and are more scratch resistant.
Uni-Body Design	All components of the Featherlite stock trailer from side posts to roof rails to roof bows to cross members are engineered into a uni-body design.	The uni-body design makes the trailer stronger and more durable for the long haul. It also gives you the smoothest tow possible.
Crossmembers	3" aluminum crossmembers run every 12" under the trailer.	Featherlites have a solid support system underneath the trailer for your heavy loads of livestock.
Aluminum Floor	Featherlite's skid resistant interlocking extruded aluminum floor is standard.	The aluminum floor is stronger & more durable to last longer through heavy use when hauling livestock.
Center Gate	Full swing center gate with slam latch is standard. Depending on floorplan, choose from 1, 2 or no gates depending on sorting needs.	Aluminum slam latch on center gates allows gates to be shut quickly & easily for convenience and safety when you're loading livestock. Featherlite's new slam latch design is even stronger and easier to use for you and your livestock's safety.
Tapered Gooseneck	Featherlite goosenecks feature standard tapered noses.	The tapered gooseneck creates better aerodynamics during travel.
